Agenda

- Why making apps for macOS?
- Considerations when making Mac apps
- Finding inspiration
- Practical example
- Conclusion
- Q&A

Why making apps for macOS?

Bigger screen

The larger screen provides more real estate for displaying content, which can result in a better user experience.

Why making apps for macOS?

Less crowned than iOS

The macOS App Store tends to have fewer apps compared to the iOS App Store.

Why making apps for macOS?

Freedom

This creative freedom enables developers to explore innovative ideas, deliver unique experiences, and push the boundaries of app development.

Finding inspiration

Where to find it?

Building the app

- Project Setup
- Building the UI
- Persisting the data
- Improving the overall experience
- Final touches
